# Application Directions

Read and follow all label instructions.

Place bait station on a firm, level surface in an area of rat activity. Maintain an uninterrupted supply of bait in bait stations. Keep filled bait station clean, dry and on a level surface. Check bait stations and replace bait insert as necessary, or at least every 1 month. Properly dispose of any leftover bait as instructed in the Storage and Disposal section of this label.

## Installing Bait Inserts in Bait Stations:

### To use new bait insert (tank and feeder tray):

- 1 Remove cap, keeping the opening down, screw tank onto tray while keeping it level. Do not overtighten.
- 2 The flow of liquid should begin immediately. Do not squeeze tank to encourage the flow of bait.
- 3 Place insert into the appropriate side of the bait station (R or L as applicable).

### To reuse feeder tray with new tank:

- 1 Remove insert (tank and tray) from bait station. Keep insert level to limit spills.
- 2 Slowly rotate insert away from you, as indicated by arrow on top of the tank, until feeder tray is on top.
- 3 Hold insert in this position for approximately 5 seconds to ensure all bait flows back into tank.
- 4 Unscrew feeder tray from tank and flip tray over until it is in upright position.
- 5 Remove cap on the new tank and keeping the opening down, screw the tank onto the tray. Do not overtighten.
- 6 The flow of liquid should begin immediately. Do not squeeze tank.
- 7 Place insert into the appropriate side of the bait station (R or L as applicable).
- 8 Screw new tank cap onto old tank and dispose in trash.
